THE NORTHERN types of Flint and Dent corn are selected for early maturity. They are both grown for many years in the same influence of severe and dry climatic conditions giving development of DENT which is distinctly better than any other from NATURE CORN in our country. This is the ONLY KIND it pays to feed and if you wish to shell and ship your surplus, it is the kind to use because it GETS RIPPED.

Sample of orders now being received.

"Please send me at once 10 Bu of your Rustler White Dent early dent corn. I want the same type of North Dakota grown cold corn that I have been getting from you for the last seven years. This corn has always ripened before Sept. 1st. I like it because it makes good hard corn and is earlier than Minnesota 13. I have never bought seed corn from anyone else since I first tried out your early type of North Dakota Grown seed corn seven years ago."

J. W. Johnson, Jan. 12, 1924

Hi - we have used your NORTH DAKOTA GROWN SEED CORN and  
it GETS THIN.

Send a fair sample of the variety which we receive for our kind  
of corn.

Friends who have used it want the same kind again this year.

WE HAVE IT. May we have your order?

Dealers in

HARDWARE & SEED

Portland, N. D., Jan. 8, 1924.

Mr. D. D. Simmons,

Moorhead, Minn.

Dear Mr. Simmons:-

Regarding our seed corn order for 1924. You may ship  
us something in February. We trust that you will ship us the same  
kind of quality early corn that you have been doing the past year.

We have had splendid success with your Minnesota #13,  
North Dakota Gold and North Dakota White Flint.

Johnson Flint has given their corn field a fair  
yield and perfectly ripe corn and a splendid yield per acre.

Yours truly,

Haugom & Grinley.
